

Our logo says it all. Cadick Corporation is a multi-faceted consulting firm specializing in electrical power services that are unavailable from most sources. Our highly trained team of engineers and technicians has a rich mixture of knowledge and abilities gained from hundreds of years of collective experience. And we always bring that expertise to bear in taking care of your needs.

Consider our principal services:

- electrical safety services
- engineering and engineering studies
- training
- field services in a variety of areas
- project management

Consider some of our major clients:

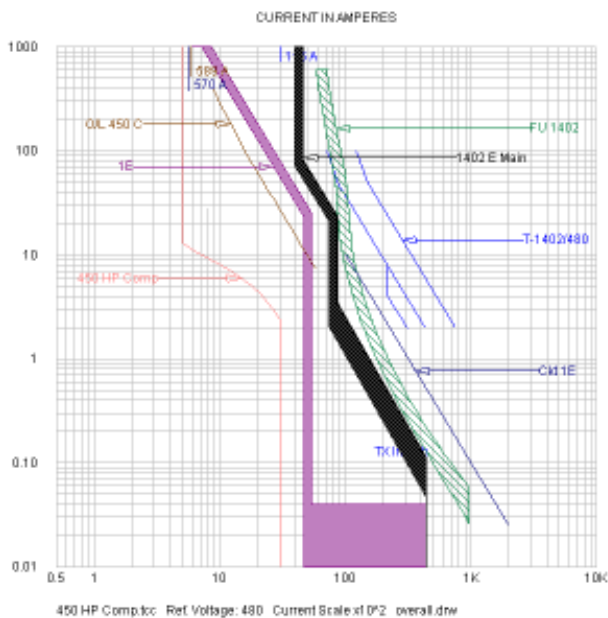

- IBM
- Citgo
- Alstom
- US Coast Guard (USCGC Healy)
- St. Gobain Container Corporation
- Garland Power & Light
- Millennium Chemicals
- AES Shadypoint
- Archer Daniels Midland
- Phelps Dodge Mining

Consider some of our many projects:

- Annual training and grooming for a high technology ice breaker
- Engineering studies for agricultural products companies, container companies, mining companies, technology companies, utilities, and manufacturers
- Development of computerized test procedures for major petrochemical companies
- Turn-key design, procurement, and installation of protective relaying for a large utility generating plant
- Electrical safety audits at major plants and installations nationwide and around the world
- Development of system-wide safety procedures for a major metals company
- Development of an on-board instrument calibration system for maritime applications

Now, consider what
Cadick Corporation can
do for your company.

For a third of a century Cadick Corporation has established its reputation as one of the premier technology companies serving the electric power industry. For more information visit our website at <http://www.cadickcorp.com> and request one of our service-specific brochures, or call us at 972.240.1594.

Training Courses

- Electrical Safety
- IEEE color book courses
- System and plant operator training courses
- NFPA 70E seminars
- Basic Electrical Maintenance seminars
- Power system engineering courses
- Customized training developed and presented to client specifications

Field services

- Troubleshooting electrical systems
- Shipboard testing and maintenance services
- Shipboard electrical instrumentation calibration services

Engineering Services

- Short circuit analysis (Safety-related)
- Coordination studies (Safety-related)
- Flash hazard analysis (Safety-related)
- Electrical safety audits
- Protective system design and studies
- Load flows
- Harmonic analysis
- Transient analysis studies
- Electrical system audits
- One-line diagram development
- Fault and failure analysis
- Design of shipboard electrical instrumentation calibration systems

Electrical Safety

- Comprehensive electrical safety audits
- Safety procedure development
- Switching procedures
